WHO DOES THIS MODULE APPLY TO?

This module is designed for signatories who invest directly in fixed income and implement responsible investment for at least some of those assets.

It is not applicable to investors who exclusively use external managers for their responsible investment in fixed income1. They will instead report on this in the external investment manager selection, appointment and monitoring (SAM) module.

This module seeks information at the organisational level and for fixed income investments in aggregate; reporting should be done for all fixed income AUM and not focus on one fund or product.

It is mandatory to complete this module for signatories who have either 10% of their AUM, or US$10bn or more, directly invested in fixed income in the relevant reporting year.

The fixed income asset types that can be reported on in this module include:

- Fixed income - Securitised
- Fixed income - SSA
- Fixed income - Corporate
- Fixed income - Private debt

Signatories will be able to differentiate their private debt practices throughout the module by selecting the corresponding answer option in the relevant indicators. The module also includes one indicator specifically focused on private debt.

More information on how to incorporate ESG in fixed income, including practical guides, tools and case studies, can be found on the PRI’s dedicated fixed income webpage.

The module’s explanatory notes will provide additional guidance and resources at an indicator level.

---

1 If your fixed income investments are constrained in any way that limits your ability to apply a responsible investment approach, you will be able to indicate this at the relevant indicator within the Organisational Overview (OO). For example, local regulations may restrict investments in foreign denominated or issued bonds.
RESULTS OF THE REPORTING FRAMEWORK REVIEW

SIMPLER AND MORE CONSISTENT
- There are fewer indicators and sub-indicators than in previous years.
- We removed indicators that were largely descriptive, process oriented, required overly detailed responses, prone to misinterpretation and geared towards what signatories are doing rather than how.
- The fixed income and listed equity modules are aligned, where applicable.
- There are fewer indicators on stewardship in this module, as these have been simplified across asset classes and moved to the Investment & Stewardship Policy module.

EVOLVED AND MORE CHALLENGING
- The module is still process oriented but is focused on how robust ESG incorporation processes are, and whether they are consistently applied to all fixed income AUM.
- Signatories will be required to indicate the depth of activities for some indicators or the AUM coverage for a practice (this has been detailed in the module overview below).
