WHO DOES THIS MODULE APPLY TO?

The Organisational overview (OO) module is applicable for all PRI signatories.

This module aims to identify a signatory's organisation type and characteristics, including its assets under management, enabling the PRI to establish the relevant peer group.

Responses to this module will also determine which indicators will be shown to signatories in other modules of the Reporting Framework. Importantly, they will ensure that signatories do not have to provide responses to indicators that are not relevant to their organisation.

Does your organisation have subsidiaries that are also PRI signatories in their own right?

O (A) Yes  
O (B) No

**Explanatory notes**

**Purpose of indicator**

The PRI signatory sign-up guidelines require that the highest level of a signatory organisation signs up on behalf of the entire organisation, including its subsidiaries. This means that signatories are required to report on all their consolidated AUM.

However, once an organisation has become a PRI signatory, its subsidiaries may still choose to sign up independently. If the reporting signatory is a majority owner of a subsidiary that has signed the PRI independently, the PRI still encourages them to report on all AUM on a consolidated basis to produce a more holistic view of the responsible investment processes and practices within the group.

The PRI recognises that a consolidated submission may require additional time and resources to prepare. Therefore, if a reporting signatory has subsidiaries that are already reporting to the PRI independently, it has the option in the next indicators to (i) indicate which of its subsidiaries are separate PRI signatories and (ii) exclude some of these subsidiaries from its own submission, referring the reader to the subsidiaries’ individual submissions instead.

**Additional reporting guidance**

The reporting signatory should ensure that their subsidiaries have signed the PRI and are completing the reporting before excluding them from their own report.

**Guidance on reporting on subsidiaries and consolidated reporting**

When determining the scope of reporting, responding organisations (asset owners (AOs) or investment managers (IMs)) should report on the total consolidated AUM of the entity that is the PRI signatory, including any subsidiaries that are more than 50% owned by the parent entity. All the AUM of majority-owned subsidiaries should be included in the total AUM figure reported by the parent entity.

There are some exceptions to the above: 
(i) An AO that majority owns an IM can exclude funds managed by subsidiary IMs on behalf of third parties from their reported funds. This is designed to give AOs the option to report only on funds managed on behalf of their own beneficiaries.

(ii) If a subsidiary of a signatory is also a signatory to the PRI, the subsidiary will have to complete the Framework separately for their own total AUM, including any funds managed on behalf of their parent entity and other clients. In this case the parent entity is still encouraged to report its consolidated AUM (and hence still describe the activities of its subsidiary in its consolidated report), but it also can choose to exclude funds managed by the subsidiary from its own reported total AUM figure [OO 4] and hence from all the activities reported.

### Explanatory notes

**Purpose of indicator**

The PRI signatory sign-up guidelines require that the highest level of a signatory organisation signs up on behalf of the entire organisation, including its subsidiaries. This means that signatories are required to report on all their consolidated AUM.
However, once an organisation has become a PRI signatory, its subsidiaries may still choose to sign up independently. Therefore, if a reporting signatory has subsidiaries that are already reporting to the PRI independently, they have the option in this indicator to exclude these subsidiaries from their own submission and refer the reader to the individual submissions of these subsidiaries.

### Additional reporting guidance

The reporting signatory should ensure that their subsidiaries have signed the PRI and are completing the reporting before excluding them from their own report.

It is important that a signatory’s approach is consistent throughout the Reporting Framework. If a subsidiary’s activities or AUM have been excluded in this indicator, they should be excluded from all reported information, including the signatory’s organisation type [OO 1], AUM figure [OO 4] and the asset breakdown [OO 5].

**Guidance on reporting on subsidiaries and consolidated reporting**

When determining the scope of reporting, responding organisations (asset owners (AOs) or investment managers (IMs)) should report on the total consolidated AUM of the entity that is the PRI signatory, including any subsidiaries that are more than 50% owned by the parent entity. All the AUM of majority-owned subsidiaries should be included in the total AUM figure reported by the parent entity.

**What were your total assets under management (AUM) at the end of the indicated reporting year?**

_Provide the amount in USD._

(A) AUM of your organisation, including subsidiaries

(B) AUM of subsidiaries that are PRI signatories in their own right and excluded from this submission

(C) AUM subject to execution, advisory, custody, or research advisory only

### Explanatory notes

**Purpose of indicator**

The PRI requires that signatories provide their AUM figure upon joining and every year that they complete the PRI Reporting Framework.

The PRI uses this information in a number of ways:

(i) to assign the correct fee band to signatories,
(ii) to calculate the overall PRI signatory AUM,
(iii) to create peer groups for assessment of signatories and
(iv) in signatory segmentation activities, including calculating the size of asset class allocations.
### Additional reporting guidance

The figure reported should represent signatories’ total AUM at the end of the reporting year. It should include uncalled commitments (e.g. in private equity or infrastructure).

Signatories who have subsidiaries that are also PRI signatories should provide responses that are consistent with their responses to indicator [OO 2] above, where they indicate whether they will report on the activities of those subsidiaries.

(i) Signatories who have chosen to report on the activities of some or all of their subsidiaries should report such subsidiaries’ AUM in answer option A in [OO 4].

(ii) Signatories who have chosen not to report on the activities of some or all of their subsidiaries should report such subsidiaries’ AUM in answer option B in [OO 4].

In option C “execution, advisory, custody, or research advisory only” refers to the following services:

- Execution and/or advisory services offer clients a platform of holdings and funds to invest in. The signatory may or may not advise these clients, but they ultimately make the investment decision.
  - (1) Advisory services involve offering clients investment advice while leaving the decision (or approval of a recommendation) to the client.
  - (2) Execution-only services offer the client a platform to make investments but do not involve advising the client.

Categories (1) and (2) above include investment platforms and/or third-party fund supermarkets on an execution or advisory basis.

- (3) Custody services typically include the settlement, safekeeping and reporting of clients’ securities and cash.

These types of services are typically offered by retail or private banks. Some investment management houses also provide these services.

### Explanatory notes

**Purpose of indicator**
Signatories who are in the fundraising process (i.e. whose AUM consist of 100% of uncalled commitments) and are thus unable to provide an AUM figure can indicate so in this indicator.

**Additional reporting guidance**
Signatories who are still in their fundraising process and not managing assets yet should report this in this indicator and are expected to report on this module (Organisational Overview) and the Investment and Stewardship Policy (ISP) module.

#### Explanatory notes

**Purpose of indicator**

Signatories’ responses to this indicator will determine which modules, sections and indicators they will need to complete in later stages of the Reporting Framework.

**Additional reporting guidance**

**Internally and externally managed assets**

"Internally managed assets" are those for which investment decisions (e.g. buy/sell/hold/weight) are made within the organisation itself, including consolidated and wholly owned subsidiaries.

"Externally managed assets" are those for which investment decisions (e.g. buy/sell/hold/weight) are made by third-party organisations, such as investment managers, on an organisation’s behalf.

Investment managers that primarily perform investment research internally and provide lists of eligible securities (or ineligible securities) to a sub-advisor(s) should list their assets as internally managed. Funds of funds (including funds of hedge funds) and managers of managers whose investment decisions (e.g. buy/sell/hold) for the underlying assets are made by third parties should list their assets as externally managed.

Signatories who have a fiduciary manager who manages some of their assets directly themselves should report those assets as internally managed. Signatories whose fiduciary manager selects, appoints and monitors external managers should report the relevant assets as externally managed.

**Fixed income and private debt**

For the purposes of the PRI Reporting Framework, private debt should be reported under fixed income.

**Listed equity and REITs**

For the purposes of the PRI Reporting Framework, investment trusts and similar quoted financial vehicles (including REITS) are considered to be listed equities and should be reported under "Listed equity". This is in line with some indices.

**Private equity, real estate and infrastructure**

Infrastructure and real estate are treated as separate reporting categories. This is due to the different characteristics of investments in these sectors. When possible, non-listed equity investments in infrastructure and real estate should be reported in those categories rather than as private equity.

Secondary interests in limited partnership investment funds should be reported in the Manager Selection, Appointment and Monitoring (SAM) module.
Hedge funds
Investments in private or public companies through hedge fund structures should be reported as hedge funds only and not double counted (for example, listed equity held in hedge fund structures should not also be reported under listed equity).

Monetary assets
Cash, cash equivalents and/or overlays and money market assets should be reported as "Other". If these assets are off-balance sheet, they should be reported as "Off-balance sheet".

Other
This category includes assets that do not fit any of the above categories. Trade finance and corporate credit should be reported under "Other".

Off-balance sheet
Cash, cash equivalents and/or overlays and money market assets that are off-balance sheet should be reported under "Off-balance sheet".

Signatories should report their derivative securities related to each asset class as "Off-balance sheet", and not in the asset class.

Examples of derivatives include futures (commodity futures, currency futures, dividend futures, etc.), forwards, swaps (interest-rate, currency, index-return, Constant Maturity swaps, Total return Swap etc.), exotic derivatives (inflation derivatives, weather derivatives, credit-linked note, credit derivatives, equity-linked note, etc.).

Committed funds
Ideally, signatories' asset class mix should include all uncalled commitments and committed funds (e.g. in private equity or infrastructure). However, if a signatory classifies these differently (e.g. if they are only able to provide a breakdown for invested capital), then it should be reported in that way. Signatories whose AUM fully consist of uncalled commitments (i.e. signatories who are still in the fundraising process) should indicate this in [OO 4.1].

### Explanatory notes

#### Purpose of indicator

This indicator is required for gateway and peering purposes and to contextualise signatories’ responses going forward. Signatories’ breakdown of pooled and segregated funds will unlock subsequent indicators.

The PRI understands that incorporating ESG factors into the appointment of external investment managers can be more challenging for signatories investing mainly or solely in pooled funds. This is considered in subsequent indicators in the Reporting Framework. ESG incorporation into the selection and monitoring of external investment managers is, however, fully applicable to signatories investing mainly or solely in pooled funds.

#### Additional reporting guidance

This indicator only applies to externally managed assets. All percentages should represent the percentage of signatories' externally managed assets in segregated mandates/pooled funds/fund of funds.

### Logic

#### Dependent on

The options (1) to (10) shown in [OO 5.1] will match those which have >0% in "External" of [OO 5]

**Purpose of indicator**

This indicator is required for gateway and peering purposes and to contextualise signatories’ responses going forward. The breakdown of passive, active quantitative, active fundamental and other strategies will be used to trigger subsequent indicators.
### Additional reporting guidance

"Other" refers to strategies that do not match any of the listed equity strategies in the answer options. These may be active strategies that combine active quant and active fundamental strategies, or other strategies that signatories believe do not fit within the definitions of the other listed equity strategies.

### Explanatory notes

**Purpose of indicator**
Under PRI Principle 1 signatories commit to incorporating ESG factors into investment analysis and decision-making processes. This indicator allows signatories to report on the proportion of their listed equity assets that are covered by different ESG incorporation approaches. Signatories’ responses to this indicator will also determine which indicators they will see in later stages of the Reporting Framework.

**Additional reporting guidance**
ESG factors can be incorporated into investment practices using three approaches: integration, screening and thematic. Investors may select between or combine these approaches based on their desired outcomes. These may be to enhance their risk-return profile, avoid specific sectors or drive capital towards particular environmental and/or social goals.

In this indicator "alone" refers to not combined with any other strategies.

If two strategies are applied to the same asset, the relevant combination options should be selected. For example, if screening is applied for only 5% of listed equity assets and a combination of screening and integration is applied for the remainder, "screening alone" should be reported for the 5% and "screening and integration" should be reported for the remaining 95%.

If no incorporation approach is applied and the option "None" accounts for 100% of listed equity assets, the ESG incorporation indicators in the listed equity module will not be applicable. However, signatories will still be scored for the module overall.

**Other resources**
For further guidance refer to [An introduction to responsible investment: listed equity](#).

Explanatory notes

Purpose of indicator
Under PRI Principle 1 signatories commit to incorporating ESG factors into investment analysis and decision-making processes. This indicator allows signatories who outsource some or all of their investment activities to external investment managers to report on the ESG incorporation approaches used by their external managers for their listed equity and/or fixed income assets in implementing this principle. Signatories’ responses to this indicator will also determine which indicators they will see in later stages of the Reporting Framework.

Additional reporting guidance
Responses to this indicator should reflect the actual approach of signatories' external investment managers. This may differ from the approach requested by the reporting signatory.

ESG factors can be incorporated into investment practices using three approaches: integration, screening and thematic. Investors may select between or combine these approaches based on their desired outcomes. These may be to enhance their risk-return profile, avoid specific sectors or drive capital towards particular environmental and/or social goals.

In this indicator "alone" refers to not combined with any other strategies.

For example, if screening is applied for only 5% of listed equity assets and a combination of screening and integration is applied for the remainder, "screening alone" should be reported for the 5% and "screening and integration" should be reported for the remaining 95%.

**Does your organisation have a captive relationship with some or all of its external investment managers?**

### Explanatory notes

**Purpose of indicator**

This indicator aims to identify signatories who have a captive relationship with their external investment managers. Indicating that they have a "captive relationship" with their external managers, as per the definition of this term provided below, will determine the applicability of subsequent indicators in the Reporting Framework.

**Additional reporting guidance**

In this indicator "captive relationship" refers to the relationship between some asset owners and their external (investment) manager(s), in which the asset owner has to work with a specific external manager and does not have the option to choose a different one. This may be the case, for instance, when the asset owner and the external manager belong to the same group or corporation. This does not include cases where the signatory has a strong historical relationship with their external manager but could freely select a different one.

**Logic**

**Dependent on**

• "(C) Fixed Income - Passive" in [OO 11] will be applicable for reporting if "(2) No" is selected in [OO 7], and >0% is reported in passive options (1, 2, 3) in "(B) or (C) External allocation" of [OO 5.2 FI]

• "(D) Fixed Income - Active" in [OO 11] will be applicable for reporting if "(2) No" is selected in [OO 7], and >0% is reported in active options (4, 5, 6, 7) in "(B) or (C) External allocation" of [OO 5.2 FI]

**Explanatory notes**

**Purpose of indicator**

This indicator aims to identify signatories who, for one or more asset classes, have 90% or more of their externally managed assets under captive relationships with their external (investment) manager(s).

The PRI recognises that, in such cases and for the relevant asset class, signatories may not have the possibility of designing an external (investment) manager selection process that takes into account ESG considerations. Therefore, in the Manager Selection, Appointment and Monitoring (SAM) module, such signatories will only report and be scored on appointment and monitoring for the relevant asset class. This will not have a negative impact on their scores.

**Additional reporting guidance**

In this indicator "captive relationship" refers to the relationship between some asset owners and their external (investment) manager(s), in which the asset owner has to work with a specific external manager and does not have the possibility to choose a different one. This may be the case, for instance, when the asset owner and the external manager belong to the same group or corporation. This does not include cases where the signatory has a strong historical relationship with their external manager but could have freely selected a different one.

### Additional reporting guidance

- **In option A “through service providers”** refers to engagements conducted via:
  1. Commercial parties that provide standalone engagement services, without managing their clients’ underlying assets, that involve an explicit fee and an explicit mandate that go beyond a simple membership fee or
  2. These include engagements conducted entirely on an outsourced basis as well as those facilitated by the service provider, but the investor’s own staff undertake some of the engagement activity. Service providers do not include coordinated collaborative engagements, nor do they include mass requests for disclosure carried out on behalf of members of an organisation.

- **In option C “conducted via internal functions”** refers to internal staff alone conducting stewardship activities with no involvement or support from other investors, investor networks or service providers, and/or the activities are conducted in the name of the organisation and the staff do not act on behalf of other organisations.

This might include groups of investors working together without the involvement of a formal investor network or other membership organisation and/or groups of investors working together with the support of a formal investor network or other membership organisation, including the PRI.

**Gateway to:** Multiple indicators
(i) commercial parties that provide standalone engagement services, without managing their clients’ underlying assets, that involve an explicit fee and an explicit mandate that go beyond a simple membership fee or
(ii) investor organisations that conduct engagement on their members’ behalf and that have an explicit fee and an explicit mandate from their members to represent them that go beyond a simple membership fee. These include engagements conducted entirely on an outsourced basis as well as those facilitated by the service provider, but the investor’s own staff undertake some of the engagement activity. Service providers do not include coordinated collaborative engagements, nor do they include mass requests for disclosure carried out on behalf of members of an organisation.

In option B “through external managers” refers to conducting stewardship activities, whether individual or collaborative, via external investment managers.

In option C “conducted via internal functions” refers to internal staff alone conducting stewardship activities with no involvement or support from other investors, investor networks or service providers, and/or the activities are conducted in the name of the organisation and the staff do not act on behalf of other organisations.

In option D “collaboratively” refers to conducting stewardship activities (specifically engagement) jointly with other investors. This might include groups of investors working together without the involvement of a formal investor network or other membership organisation and/or groups of investors working together with the support of a formal investor network or other membership organisation, including the PRI.

Gateway to OO module logic:

[OO 14] will list asset classes which are eligible for reporting based on [OO 10] or [OO 11, 12, 13], and identify them as mandatory or voluntary based on the response to [OO 4] and [OO 5]. Specifically:

• "(J) SAM - Listed Equity" in [OO 14] will be shown in the voluntary module if the following three conditions are met: i) option (1) for any of (A) or (B) in any of [OO 11, OO 12, OO 13] are selected, and ii) "(B) Listed Equity - External" of [OO 5] is <10% of AUM, and iii) the absolute value is under US$ 10 billion when calculated based on [OO 4].  
  o If condition (i) and none or only one of condition (ii) or (iii) are met, then "(J) SAM - Listed Equity" will be in the mandatory module section of [OO 14] and "(2) No, opt out of reporting on the module" won't be available.

### Explanatory notes

#### Purpose of indicator
Signatories’ responses to this indicator will determine which indicators they will see in later stages of the Reporting Framework.

#### Additional reporting guidance

Gateway to

OO module logic:

[OO 14] will list asset classes which are eligible for reporting based on [OO 10] or [OO 11, 12, 13], and identify them as mandatory or voluntary based on the response to [OO 4] and [OO 5]. Specifically:

- "(J) SAM - Listed Equity" in [OO 14] will be shown in the voluntary module if the following three conditions are met: i) option (1) for any of (A) or (B) in any of [OO 11, OO 12, OO 13] are selected, and ii) "(B) Listed Equity - External" of [OO 5] is <10% of AUM, and iii) the absolute value is under US$ 10 billion when calculated based on [OO 4].
  - If condition (i) and none or only one of condition (ii) or (iii) are met, then "(J) SAM - Listed Equity" will be in the mandatory module section of [OO 14] and "(2) No, opt out of reporting on the module" won't be available.

- "(K) SAM - Fixed Income" in [OO 14] will be shown in the voluntary module if the following three conditions are met: i) option (1) for (C) or (D) in any of [OO 11, OO 12, OO 13] are selected, and ii) "(D) Fixed Income - External" of [OO 5] is <10% of AUM, and iii) the absolute value is under US$ 10 billion when calculated based on [OO 4].
  - If condition (i) and none or only one of condition (ii) or (iii) are met, then "(K) SAM - Fixed Income" will be in the mandatory module section of [OO 14] and "(2) No, opt out of reporting on the module" won't be available.

- "(L) SAM - Private Equity" in [OO 14] will be shown in the voluntary module if the following three conditions are met: i) option (1) for "(E) Private Equity" in any of [OO 11, OO 12, OO 13] are selected, and ii) "(F) Private Equity - External" of [OO 5] is <10% of AUM, and iii) the absolute value is under US$ 10 billion when calculated based on [OO 4].
  - If condition (i) and none or only one of condition (ii) or (iii) are met, then "(L) SAM - Private Equity" will be in the mandatory module section of [OO 14] and "(2) No, opt out of reporting on the module" won't be available.

- "(M) SAM - Real Estate" in [OO 14] will be shown in the voluntary module if the following three conditions are met: i) option (1) for "(F) SAM - Real Estate" in any of [OO 11, OO 12, OO 13] are selected, and ii) "(H) Real Estate - External" of [OO 5] is <10% of AUM, and iii) the absolute value is under US$ 10 billion when calculated based on [OO 4].
  - If condition (i) and none or only one of condition (ii) or (iii) are met, then "(M) SAM - Real Estate" will be in the mandatory module section of [OO 14] and "(2) No, opt out of reporting on the module" won't be available.

- "(N) SAM - Infrastructure" in [OO 14] will be shown in the voluntary module if the following three conditions are met: i) option (1) for "(G) SAM - Infrastructure" in any of [OO 11, OO 12, OO 13] are selected, and ii) "(J) Infrastructure - External" of [OO 5] is <10% of AUM, and iii) the absolute value is under US$ 10 billion when calculated based on [OO 4].
  - If condition (i) and none or only one of condition (ii) or (iii) are met, then "(N) SAM - Infrastructure" will be in the mandatory module section of [OO 14] and "(2) No, opt out of reporting on the module" won't be available.

- "(O) SAM - Hedge Funds" in [OO 14] will be shown in the voluntary module if the following three conditions are met: i) option (1) for "(H) SAM - Hedge Funds" in any of [OO 11, OO 12, OO 13] are selected, and ii) "(L) Hedge funds - External" of [OO 5] is <10% of AUM, and iii) the absolute value is under US$ 10 billion when calculated based on [OO 4].

**Explanatory notes**

**Purpose of indicator**

Signatories are only required to report on internally or externally managed asset classes that represent either 10% of their AUM or USD 10 billion or more in the relevant reporting year. This indicator allows signatories to voluntarily report on modules or asset classes where they do not meet the AUM threshold.

This indicator will only provide signatories with the opportunity to report on modules (i) that refer to asset classes that they hold, whether internally or externally managed, but where they do not meet the abovementioned AUM threshold and (ii) for which signatories have not previously indicated that they do not conduct ESG incorporation.
Signatories who have stated in previous indicators that they do not implement responsible investment in certain asset classes or areas will not see the corresponding module or section in this indicator, even if their AUM in the relevant asset class is over 10% of their AUM or over USD 10 billion.

### Voluntary reporting

If a signatory has less than 10% of their total AUM in an asset class, and the asset class represents less than $10 billion, it is voluntary for signatories to report in that asset class module.

If a signatory manages the assets indirectly, through external managers, the same asset class thresholds apply but the signatory can choose whether to report on this in the external investment manager selection, appointment and monitoring (SAM) module.

Signatories who indicate that they would like to voluntarily report on a specific module and/or asset class will be required to respond to all "core" indicators in the corresponding module.

### Mandatory reporting

1. If a signatory has 10% or more of their total AUM in an asset class it is mandatory for signatories to report in that asset class module.

2. If a signatory has less than 10% of their total AUM in an asset class, and the asset class represents $10 billion or more, it is mandatory for signatories to report in that asset class module.

If a signatory manages the assets indirectly, through external managers, the same asset class thresholds apply but the signatory will need to report on this in the external investment manager selection, appointment and monitoring (SAM) module.

Signatories reporting on stewardship activities via service providers or internal staff on externally managed assets

The following applies to signatories who, for a given asset class, only have externally managed assets, but partly or fully conduct voting and/or engagement for those assets directly (i.e., via service providers or internal staff).

Such direct stewardship activities should be reported via the stewardship indicators in the corresponding asset class module. To do so, signatories should select the asset class module which will be listed as a 'Voluntary to report' module in OO 14. This will unlock only the stewardship indicators of the asset class module.

### Logic

**Dependent on**

OO module logic:
[OO 14] will list asset classes which are eligible for reporting based on [OO 9], [OO 10] or [OO 11, 12, 13], and identify them as mandatory or voluntary based on the response to [OO 4] and [OO 5]. Specifically:

For each asset class, if at least one of the conditions (iii) and (iv) are not met, then that asset class will be in the section for mandatory to report modules and the "'(2) No, opt out of reporting on the module'" will not be available.

"(A) Listed Equity" in [OO 14] will be in the section for voluntary to report modules if the following conditions are met in the structure "'(i or ii) and iii and iv':

### Explanatory notes

**Purpose of indicator**

The management type of real estate assets is relevant to understanding the investor's potential and responsibility to influence the management of the assets. This indicator is required for gateway and peering purposes and to contextualise signatories' responses going forward.

**Additional reporting guidance**

The percentage breakdown should be based on the number of physical real estate assets.

Direct physical real estate assets managed "directly by our organisation" refers to the signatory organisation having operational control.
In this indicator "operational control" refers to having the ability to introduce and implement operating policies, health and safety policies and/or environmental policies.

If a single tenant or tenants have the greatest authority to introduce and implement operating policies and environmental policies, the tenant should be assumed to have operational control, in which case the assets should be reported as "by a tenant(s) with operational control". If both the signatory and the tenant have the authority to introduce and implement day-to-day operational procedures, the asset should be reported as "directly by our organisation".

In this indicator "tenant" refers a person or group that occupies a house, office, industrial estate or similar.

### Explanatory notes

**Purpose of indicator**
This indicator is required for peering purposes and to contextualise signatories’ responses going forward. It will also allow signatories and users of the Reporting Framework data to filter responsible investment approaches by level of influence of the investor.

**Additional reporting guidance**
The percentage breakdown should be based on the number of physical infrastructure assets.

**Additional reporting guidance**
- This indicator is applicable only for signatories who have equity stakes in infrastructure assets. The percentage breakdown should be based on the number of physical infrastructure assets.
(i) Infrastructure management refers to the day-to-day operation and execution of decisions for infrastructure assets. It does not refer to investment decision making (e.g. acquisition decisions).

(ii) Managed "directly by our organisation" refers to either an internal team that operates externally to manage the infrastructure assets and/or companies that control the operations of infrastructure assets in which the signatory has ownership.

(iii) Managed "by third party infrastructure operators that we appoint" refers to appointed third party operators not owned by the signatory and that have their own management and operating staff in place for infrastructure assets in which the signatory has ownership.

(iv) Managed "by other investors or their third party operators" is often applicable if the signatory has minority stakes in infrastructure assets.

(v) Managed "by public or government entities or their third party operators" refers to cases where the infrastructure assets are managed by public co-investors or backers (e.g. governments) or their appointed third party organisations.

These explanations are aligned with GRESB.

**Other resources**
For further guidance on ESG incorporation into forestry, see An introduction to responsible investment in forestry.

For further guidance on ESG incorporation into farmland, see the PRI’s dedicated farmland webpage.

The PRI’s investment tools showcase how ESG can be incorporated into specific asset classes.

### Explanatory notes

**Purpose of indicator**
Under Principle 1 of the PRI signatories commit to incorporating ESG factors into investment analysis and decision-making processes. Under PRI Principle 2 signatories commit to being active owners and incorporating ESG factors into their ownership policies and practices. This indicator allows signatories to explain the reasons why they are not incorporating ESG and addressing stewardship in these asset classes.

**Additional reporting guidance**
Signatories may elaborate on the reasons why, for each relevant asset class, they are not implementing PRI Principle 1 (we will incorporate ESG issues into investment analysis and decision-making processes) and/or Principle 2 (we will be active owners and incorporate ESG issues into our ownership policies and practices).

**Other resources**
