<tr>
<td>The indicator level assessment has changed where appropriate to align with updates to the Reporting Framework indicators and to reflect changes in the responsible investment industry, as well as future advancements. Clarity of the indicators’ assessment has also been improved. You can find these <a href="#">here</a>.</td>
<td>The methodology for how indicator level assessment translates to module level assessment scores remains consistent with the 2021 methodology. The scoring thresholds will be published in November. You can find more information <a href="#">here</a>.</td>

*Percentage achieved from applicable assessed indicators, calculated as total points achieved/total points available (only considering indicators relevant for the signatory) in the module.
Indicator level assessment – Indicator types

There are two types of indicators in the Reporting Framework

- **Assessed**
  - Mandatory
  - Public
  - Relatively stable
  - Process-focused
  - Closed-ended

- **Not assessed**
  - Voluntary
  - Public or private (signatories’ choice)
  - Evolving
  - Process and outcomes focused
  - Closed- and open-ended

Only ‘core’ indicators are assessed but **free-text responses in ’core’ indicators are not assessed** as no qualitative data is considered in the scoring.
Indicator level assessment – Scoring styles

Varied approaches for assessing different indicators’ styles

The differing scoring styles are based on the principle of 100 points being available for allocation from the initial phase of assessment.

The three main approaches applied are:

- **Learning curve**
  More advanced practices are worth more points.

- **More is better**
  The more answer options selected; the more points scored.

- **Coverage and Frequency**
  In some instances, AUM coverage and/or frequency of a practice or conditions will contribute to the points allocation.

See Appendix for some practical scoring styles examples in the Reporting Framework modules.
## Indicator level assessment – Scoring styles

Varied approaches for assessing different indicators' styles

<table>
<thead>
<tr>
<th><strong>“Other” answer options</strong></th>
<th>“Other” answer options may or may not be scored, depending on how well the remaining answer options capture the most relevant practices.</th>
</tr>
</thead>
</table>
| **“N/A” - not applicable** | The indicator (or module) is **not applicable**, and therefore not scored if:  
  - a signatory has no AUM within the asset class/sub-strategy, or  
  - the indicator is not applicable in a particular signatory’s context.  
  Asset owners will receive a N/A score for all their internally managed AUM. See [page 11](#) for further details. |
| **“N/R” - not reported**  | The indicator (or module) is classified as **not reported**, and therefore not scored if a signatory opts out of voluntarily reporting. |

When ESG is not incorporated into internally and/or externally managed asset classes, signatories will be penalised even when opting out of voluntary reporting. Please refer to the [pages 11 to 14](#) for more information.
Indicator level assessment – Scoring pathways

A scoring pathway exists between two or more indicators when the logic link could impact the score of sub-indicators. They help promote the use of basic responsible investment practices.

Some indicators are applicable for reporting based on the response to previous indicators. When the score of an indicator is impacted by another indicator, it means there is a scoring pathway.

Key scoring pathways determining the applicability and scoring of other modules are in the Organisational overview module (see pages 11 to 14).

“Other” answer options

▪ The full list of scoring pathways can be found in the Logic guide
▪ Scoring pathways are also outlined in the Assessment section of each indicator in the Reporting Framework. Example:

<table>
<thead>
<tr>
<th>Assessment criteria</th>
<th>100 points for this indicator.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>100 points for A.</td>
</tr>
<tr>
<td></td>
<td>50 points for 1 selection from B–C.</td>
</tr>
<tr>
<td></td>
<td>0 points for D.</td>
</tr>
</tbody>
</table>

Further details:

Selecting ‘D’ will result in 0/100 points for this indicator and the following indicator: PGS 31.
Indicator level assessment – Multipliers

How the indicators scores are weighted.

Multipliers are reflective of the indicator’s relative importance with respect to responsible investment practices and/or the PRI’s overall mission. The descriptive 2023 assessment multipliers (low/ medium/ high) have been added to the Reporting Framework modules on the Investor Reporting Framework page.

**Multipliers available:**
- Low
- Moderate
- High

**Assessment process**

<table>
<thead>
<tr>
<th>100 points/ question</th>
<th>Variable multipliers</th>
<th>Percentage</th>
<th>Module level stars</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low</td>
<td>Low</td>
<td>0-100%</td>
<td>1-5 stars</td>
</tr>
<tr>
<td>Moderate</td>
<td>Moderate</td>
<td>0-100%</td>
<td></td>
</tr>
<tr>
<td>High</td>
<td>High</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- A multiplier is applied to every indicator’s score (100 points available).
- The points resulting from the indicator scores and multipliers are then used to calculate the module score.

The numerical multipliers will be visible to signatories in the Reporting Tool and in their Assessment Reports.
Module level assessment – Scoring

Module scores are based on the sum of indicators’ points after multipliers have been applied.

Example: a signatory holds < USD 10bn AND <10% of total AUM [OO 5] but does not incorporate ESG [OO 11] in one asset class (e.g. Listed Equity).

Assessment pathway used to score this signatory on the LE module.

Signatories will not receive an overall organisation score.
Module level assessment – Grading

The scoring thresholds define at which percentage boundary the module level stars are allocated. These will be published alongside signatories’ 2023 Assessment Reports in November.

- The 2023 scoring thresholds will be published in November to ensure a balanced distribution of scores.
- See the Reporting & Assessment archive for more information on previous years’ scoring thresholds.

N/A – not applicable
N/R – not reported

Allocated per module/asset class/sub-strategy, with no overall organisation score.

Assessment criteria

100 points for this indicator.
100 points for both A and B.
66 points for A.
33 points for B.
0 points for C.

Multiplier

Multiplier will be confirmed ahead of the 2023 reporting cycle starting in mid-May.

Further details:
Selecting "C" will result in 0/100 points for this indicator.

The number of asset types applicable will not affect the points available for this indicator, as each asset type will receive a separate score.
Assessment Methodology: Indicator Example

During the reporting year, how did you conduct ESG materiality analysis for your potential real estate investments?

If signatories did not analyse any potential real estate investments in the reporting year, they should refer to the last reporting year in which they analysed potential real estate investments.

1. (A) We assessed ESG materiality for each property, as each case is unique
   
   [Dropdown list]
   
   (1) for all of our potential real estate investments
   (2) for a majority of our potential real estate investments
   (3) for a minority of our potential real estate investments

2. (B) We performed a mix of property level and property type or category level ESG materiality analysis
   
   [As above]

3. (C) We assessed ESG materiality at the property type or category level only
   
   [As above]

4. (D) We did not conduct ESG materiality analysis for our potential real estate investments
