What real estate–specific ESG guidelines are currently covered in your organisation’s responsible investment policy(ies)?

- (A) Guidelines on our ESG approach to real estate depending on use (e.g. retail and education) and geography
- (B) Guidelines on our ESG approach to new construction
- (C) Guidelines on our ESG approach to major renovations
- (D) Guidelines on our ESG approach to standing real estate investments
- (E) Guidelines on pre-investment screening
- (F) Guidelines on our approach to ESG integration into short-term or 100-day plans (or equivalent)
- (G) Guidelines on our approach to ESG integration into long-term value creation efforts
- (H) Guidelines on our approach to ESG reporting
- (I) Guidelines on our engagement approach related to third-party property managers
- (J) Guidelines on our engagement approach related to tenants
- (K) Guidelines on our engagement approach related to construction contractors
- (L) Our responsible investment policy(ies) does not cover real estate–specific ESG guidelines

### Explanatory notes

**Purpose of indicator**

This indicator aims to capture whether a signatory’s responsible investment policy includes environmental, social and governance guidelines for its real estate assets. Many investors will have an organisation-wide ESG or responsible investment policy that covers all asset classes. A policy covering all asset classes is likely to leave space for interpretation regarding its application to real estate. Adapting it into specific ESG guidelines for investments in real estate and including the full scope of an organisation’s ESG approach for its real estate assets is considered good practice and will help align expectations and practices related to responsible investment in real estate.
| Additional reporting guidance | ESG guidelines specific to an organisation’s real estate investments may appear in a standalone document or the overall policy document.  
In this indicator, ‘tenant’ refers to a person or group that occupies a house, office, industrial estate or similar.  
A ‘100-day plan (or equivalent)’ is a document that contains a list of activities the investor needs to undertake within the first 100 days of investment. |
| Other resources | For further guidance, see An introduction to responsible investment: real estate.  
For guidance on how to write an RI policy, refer to An introduction to responsible investment: policy, structure and process. |

<td></td>
</tr>
</tbody>
</table>

For all of the funds that you closed during the reporting year, what type of formal responsible investment commitments did you make in Limited Partnership Agreements (LPAs), side letters, or other constitutive fund documents?

*If you did not close any funds during this reporting year, refer to the last reporting year in which you closed funds, up to five years ago.*

- (A) We incorporated responsible investment commitments in LPAs (or equivalent) as a standard default procedure
- (B) We added responsible investment commitments in LPAs (or equivalent) upon a client’s request
- (C) We added responsible investment commitments in side letters upon a client’s request
- (D) We did not make any formal responsible investment commitments for the relevant reporting year
- (E) Not applicable; we have not raised funds in the last five years

### Explanatory notes

**Purpose of indicator**
The purpose of this indicator is to understand whether and when a general partner (GP) incorporates ESG and responsible investment commitments in fund-level legal documentation. It is considered good practice to formally commit to responsible investment in LPAs, side letters or other constitutive fund documents.

**Additional reporting guidance**
This indicator only applies to GPs who invest from fund structures.

Signatories should report any formal commitments related to responsible investment implementation and consideration of ESG issues that were either initiated by the GP or requested by LPs and included in LPAs, side letters and/or other constitutive fund documents.

If no funds were closed during the reporting year, the last reporting year in which funds were closed (up to five years ago) should be referenced.

**Other resources**
Refer to [Incorporating responsible investment requirements into private equity fund terms](#) for further guidance.

During the reporting year, how did you conduct ESG materiality analysis for your potential real estate investments?

*If signatories did not analyse any potential real estate investments in the reporting year, they should refer to the last reporting year in which they analysed potential real estate investments.*

- **(A)** We assessed ESG materiality for each property, as each case is unique
  - [Dropdown list]
    - (1) for all of our potential real estate investments
    - (2) for a majority of our potential real estate investments
    - (3) for a minority of our potential real estate investments

- **(B)** We performed a mix of property level and property type or category level ESG materiality analysis
  - [As above]

- **(C)** We assessed ESG materiality at the property type or category level only
  - [As above]

- **(D)** We did not conduct ESG materiality analysis for our potential real estate investments

**Explanatory notes**

**Purpose of indicator**

This indicator aims to identify how a signatory conducts materiality analysis of ESG factors as a standard part of its due diligence process during the pre-investment phase by indicating the depth and quality of its materiality assessment. It is considered good practice to conduct property-specific materiality analysis, whether using internal or external resources.
### Additional reporting guidance

Signatories should indicate the proportion of potential real estate investments their ESG materiality analysis considered.

### Other resources

For information on materiality analysis, see a PRI blog post on Using SASB to implement PRI monitoring and disclosure resources for private equity.

**During the reporting year, what tools, standards and data did you use in your ESG materiality analysis of potential real estate investments?**

*If signatories did not analyse any potential real estate investments in the reporting year, they should refer to the last reporting year in which they analysed potential real estate investments.*

- (A) We used GRI standards to inform our real estate ESG materiality analysis
- (B) We used SASB standards to inform our real estate ESG materiality analysis
- (C) We used the UN Sustainable Development Goals (SDGs) to inform our real estate ESG materiality analysis
- (D) We used GRESB Materiality Assessment (RC7) or similar to inform our real estate ESG materiality analysis
- (E) We used climate disclosures, such as the TCFD recommendations or other climate risk and/or exposure analysis tools, to inform our real estate ESG materiality analysis
- (F) We used the UN Guiding Principles on Business and Human Rights (UNGPs) to inform our real estate ESG materiality analysis
- (G) We used geopolitical and macro-economic considerations in our real estate ESG materiality analysis
- (H) We used green building certifications to inform our real estate ESG materiality analysis
- (I) We engaged with the existing owners and/or managers (or developers for new properties) to inform our real estate ESG materiality analysis
- (J) Other Specify: _____ [Mandatory free text: small]

---

**Explanatory notes**

**Purpose of indicator**: This indicator aims to capture the tools, standards and data an organisation uses to inform their materiality analysis of ESG factors as a standard part of its due diligence process, including as part of an internal checklist or ESG tool or scorecard, during the pre-investment phase. This analysis may be completed internally using in-house tools or methodologies or externally via a service provider. It is considered good practice to use a range of tools and resources to ensure that in-depth ESG materiality assessments are conducted. The specific tools and resources used may vary depending on the context of the potential investment, e.g. industry sector and geography.

**Additional reporting guidance**: Links to various standards listed:
- Global Reporting Initiative (GRI) Standards
- Value Reporting Foundation (Sustainability Accounting Standards Board - SASB standards)
- Task Force on Climate-related Financial Disclosures (TCFD)
- Global Real Estate Sustainability Benchmark (GRESB) Materiality Assessment
- UN Guiding Principles on Business and Human Rights (UNGPs)
- UN Sustainable Development Goals (SDGs)

See GRESB building certification schemes for a list of design and/or construction green building certification schemes.

<th>Type of indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>RE 4</td>
<td>OO 21</td>
<td>Due diligence</td>
<td>1</td>
<td>CORE</td>
</tr>
</tbody>
</table>

During the reporting year, how did material ESG factors influence your selection of real estate investments?

*If signatories did not select any real estate investments in the reporting year, they should refer to the last reporting year in which they selected real estate investments.*

- (A) Material ESG factors were used to identify risks  
  - [Dropdown list]
    - (1) for all of our potential real estate investments
    - (2) for a majority of our potential real estate investments
    - (3) for a minority of our potential real estate investments

- (B) Material ESG factors were discussed by the investment committee (or equivalent)  
  - [As above]

- (C) Material ESG factors were used to identify remedial actions for our 100-day plans (or equivalent)  
  - [As above]

- (D) Material ESG factors were used to identify opportunities for value creation  
  - [As above]

- (E) Material ESG factors informed our decision to abandon potential investments in the due diligence phase in cases where ESG risks were considered too high to mitigate  
  - [As above]

- (F) Material ESG factors impacted investments in terms of the price offered and/or paid  
  - [As above]
Explanatory notes

Purpose of indicator
This indicator aims to understand whether an organisation includes ESG-related information in the investment selection process and ascertain the depth of the analysis performed. It is considered good practice for material ESG factors to have played an integral part in decision-making for all real estate investment selections during the reporting year.

Additional reporting guidance
By real estate investment selection, we mean new real estate investments that were made during the reporting year.
A ‘100-day plan (or equivalent)’ is a document that contains a list of activities the investor needs to undertake within the first 100 days of investment.
By ‘our decision to abandon potential investments in the due diligence phase’, we mean any decision that would allow for the abandonment of potential investments following issues that come to light during the due diligence phase. It would be completed after any screening of potential investments, with an exclusion list.

Other resources
For further guidance, see An introduction to responsible investment: real estate.

Assessment

Assessment criteria
100 points for this indicator divided between lettered (50 points) and coverage (50 points) answer options. The final score will be based on the highest-scoring combination of lettered and coverage answer options.

50 points for the lettered answer options:
- 50 points for 5 or more selections from A–F; **MUST** include F.
- 33 points for 4 or more selections from A–F.
- 16 points for 2–3 selections from A–F.
- 0 points for 1 selection from A–F OR G.

AND

50 points for the coverage:
- Per answer selection A to F, each option will be worth the following proportion:
  - 50/5 points for all (1).
  - 25/5 points for a majority (2).
  - 12/5 points for a minority (3).

Further details:
Selecting ‘G’ will result in 0/100 points for this indicator.

Multiplier
High
Once **material ESG factors** have been identified, what processes do you use to conduct **due diligence** on these factors for potential real estate investments?

*For investors with minority stakes in real estate investments, answer options should be selected based on how they use their influence with the assets/properties, majority shareholder(s), and/or lead investors they engage with in co-investment situations to ensure that material ESG factors are fully identified and assessed to the extent possible.*

(G) We incorporate ESG due diligence findings in all of our relevant investment process documentation in the same manner as for other key due diligence, e.g. commercial, accounting and legal

(H) Our investment committee (or an equivalent decision-making body) is ultimately responsible for ensuring all ESG due diligence is completed in the same manner as for other key due diligence, e.g. commercial, accounting and legal

(I) Other
Specify: _____ [Mandatory free text: small]

(J) We do not conduct due diligence on material ESG factors for potential real estate investments

**Explanatory notes**

**Purpose of indicator**
This indicator aims to capture the processes an organisation uses to conduct due diligence on material ESG-related risks at a pre-investment stage. It also assesses what internal or external resources are allocated to such processes and how material ESG factors are used to identify opportunities to create value. It is considered good practice to carry out due diligence to a sufficient depth, such that material ESG-related risks can be identified and assessed, and ESG value creation opportunities can also be identified for action during the post-investment period. A minimum standard of ESG due diligence could be a combination of desk-based research on publicly available information and working knowledge of ESG impacts on the target industry and sector.

**Additional reporting guidance**
- ‘We conduct site visits’ refers to physical visits made to operational sites of prospective assets or portfolio companies.
- ‘Third-party consultants’ refers to organisations or persons to which participants outsource some or all of their ESG strategy formulation and/or implementation.

- [ ] (E) We requested the assessment of current and planned availability and aggregation of metering data from potential third-party property managers
- [ ] (F) Other
  
  Specify: ____ [Mandatory free text: small]
- [ ] (G) We did not include material ESG factors in our selection of third-party property managers

**Explanatory notes**

**Purpose of indicator**

This indicator aims to understand how signatories assess a third-party property manager’s track record and expertise during the selection process to ensure alignment with their responsible investment practices. It is considered good practice for real estate investors with third-party property managers to consider material ESG factors in their selection approach.
As day-to-day property management is often outsourced to a third-party property manager, the successful management of material ESG factors will rest on selecting good third-party property managers and understanding how to work with them effectively. Good practice in property manager selection involves understanding not only high-level ESG policies that property managers have in place but also the depth and breadth to which those policies are implemented by the managers.

| Additional reporting guidance | This section is only applicable if the signatory outsources property management to third-party property managers, as reported in the Organisational Overview module. If signatories manage all properties in-house, this indicator will not be applicable. If signatories manage some properties in-house and outsource others, they should consider only those assets for which the management is outsourced. |
| Other resources | For further guidance, see An introduction to responsible investment: real estate. For guidance on questions to ask third-party property managers, see the Responsible investment DDQ for real estate investors. See also European Association for Investors in Non-Listed Real Estate Vehicles (INREV) DDQ. |

# APPOINTMENT PROCESS OF THIRD-PARTY PROPERTY MANAGERS [RE 7]

<table>
<thead>
<tr>
<th>Indicator ID</th>
<th>Dependent on</th>
<th>Gateway to</th>
<th>Sub-section</th>
<th>PRI Principle</th>
<th>Type of Indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>RE 7</td>
<td>OO 21, OO 26</td>
<td>N/A</td>
<td>Appointment process of third-party property managers</td>
<td>1, 4</td>
<td>CORE</td>
</tr>
</tbody>
</table>

How did you include **material ESG factors** when appointing your current **third-party property managers**?

If signatories did not select third-party property managers during the reporting year, they should report the most recent year in which they selected third-party property managers, up to five years ago.

- (A) We set dedicated ESG procedures in all relevant property management phases
  - [Dropdown list]
  - (1) for all of our third-party property managers
  - (2) for a majority of our third-party property managers
  - (3) for a minority of our third-party property managers

- (B) We set clear ESG reporting requirements
  - [As above]

- (C) We set clear targets on material ESG factors
  - [As above]

- (D) We set incentives related to targets on material ESG factors
  - [As above]

- (E) We included responsible investment clauses in property management contracts
  - [As above]

- (F) Other
  - Specify: ________ [Mandatory free text: small]
  - [As above]

- (G) We did not include material ESG factors in the appointment of third-party property managers
### Explanatory notes

#### Purpose of indicator

This indicator aims to understand how the signatory includes material ESG factors in the legal agreement with a third-party property manager in alignment with its internal responsible investment practices. It is considered good practice for real estate investors who outsource property management to third-party property managers to consider material ESG factors in their appointment approach.

As day-to-day property management is often outsourced to a third-party property manager, the inclusion of material ESG factors in legal agreements between the investor and third-party property managers will help define the extent to which these factors are actively managed by the latter and assessed by the former.

#### Additional reporting guidance

This section is applicable only if the signatory outsources property management to third-party property managers, as reported in the Organisational Overview module.

If signatories manage some properties in-house and outsource some, they should consider only those assets for which management is outsourced.

A majority refers to $\geq 50\%$, and a minority refers to $<50\%$ of third-party property managers. The coverage for each option should be based on the number of third-party property managers.

#### Other resources

<td></td>
<td></td>
</tr>
</tbody>
</table>

### Explanatory notes

#### Purpose of indicator

This indicator aims to understand the methods used by the signatory to examine third-party property managers’ performance and how to work with them to improve performance in alignment with its internal responsible investment practices. It is considered good practice for property investors who outsource property management to third-party property managers to consider material ESG factors in their monitoring approach.

As day-to-day property management is often outsourced to a third-party property manager, the successful management of material ESG factors includes having clear processes in place to determine how the managers’ and assets’ ESG performance will be assessed and monitored by the investor.

#### Additional reporting guidance

This section is applicable only if the signatory outsources property management to third-party property managers, as reported in the Organisational Overview module.

If signatories manage all properties in-house, this indicator will not be applicable. If signatories manage some properties in-house and outsource some, they should consider only those assets for which management is outsourced.

A majority refers to ≥50%, and a minority refers to <50% of third-party property managers. The coverage for each answer option should be based on the number of third-party property managers.

‘We conduct site visits’ refers to physical visits made to the operational sites of prospective assets or portfolio companies.

A ‘tenant’ is a person or group that occupies a house, office, industrial estate or similar.

#### Other resources

For further guidance, see An introduction to responsible investment: real estate.

**What ESG requirements do you currently have in place for all development projects and major renovations?**

- (A) We require the management of waste by diverting materials (e.g. from construction and demolition, reusable vegetation, rocks and soil) from disposal
- (B) We require the minimisation of light and noise pollution that would affect the surrounding community
- (C) We require the performance of an environmental and social site impact assessment
- (D) We require the protection of the air quality during construction
- (E) We require the protection and restoration of the habitat and soils disturbed during construction and/or during previous development
- (F) We require the protection of surface water, groundwater and aquatic ecosystems by controlling and retaining construction pollutants
- (G) We require constant monitoring of health and safety at the construction site
- (H) We require engagement with local communities and other stakeholders during the design and/or planning process
- (I) Other  
  Specify: ______ [Mandatory free text: small]
- (J) We do not have ESG requirements in place for development projects and major renovations

**Explanatory notes**

**Purpose of indicator**

This indicator aims to assess how an organisation approaches the incorporation of environmental and social factors into the construction of new buildings and/or major renovations. Having sustainability requirements in place for development projects and major renovations shows the level of responsibility that an organisation takes in making properties more sustainable. It is considered good practice for ESG issues to be considered in active property developments and major renovations to help reduce the negative effects of construction sites.

**Additional reporting guidance**

An answer option should only be selected if it applies to ALL active property development projects and major renovations.

  - [As above]
(H) Other
Specify: _______ [Mandatory free text: small]  
[As above]

- (I) We do not have minimum building requirements in place for development projects and major renovations

### Explanatory notes

#### Purpose of indicator
This indicator aims to assess whether an organisation incorporates environmental and social factors into development projects and major renovations. Having minimum building requirements in place shows the level of responsibility accepted by the signatory to make properties more sustainable and should also bring potential cost savings to light. It is considered good practice to include environmental and health requirements in development projects and in the selection of materials to conserve resources, reduce waste, limit the impact of new buildings and mitigate the health risks associated with the use of harmful materials.

#### Additional reporting guidance
The coverage for each answer option should be based on the number of active property development projects and major renovations.

- Active property developments or major renovations refer to those taking place during the reporting year.
- See GRESB building certification schemes for a list of green building certification schemes concerning design and/or construction.
- See Well and Fitwel for examples of healthy building certifications.

#### Other resources

Explanatory notes

Purpose of indicator
It is considered good practice for signatories to include relevant factors from across the ESG spectrum in their performance monitoring. Collecting the performance of ESG metrics on an ongoing basis helps signatories better understand their assets’ ESG performance, manage risks and report to clients.

Other resources
For further guidance, see An introduction to responsible investment: real estate.

</tr>
</tbody>
</table>

### Explanatory notes

**Purpose of indicator**
This indicator aims to examine the measures taken by the signatory to improve ESG performance data related to its assets. It is considered good practice to collect the performance of ESG metrics on an ongoing basis to help real estate managers and investors better monitor their building performance, manage risks and present clients with more accurate reports.

**Additional guidance**
According to the 2022 GRESB Real Estate Assessment:
Data measurement and the consistent reporting of energy consumption help entities conceptualise overall energy consumption, increase the energy efficiency of their portfolio and reduce the economic and environmental impacts associated with fossil fuel energy use.
By ‘energy consumption’, we mean electricity, fuels and district heating and cooling.

Consistent collection of water consumption data provides property companies and fund managers with the information needed to monitor their environmental impact, reduce the burden on potable water consumption and wastewater systems, assess their exposure to risks of disruptions in water supplies and reduce water expenditures.

### Other resources

### Assessment

100 points for this indicator divided between lettered (50 points) and coverage (50 points) answer options. The final score will be based on the highest-scoring combination of lettered and coverage answer options.

#### Assessment criteria

**50 points for the lettered answer options:**
- 50 points for 3 or more selections from A–D; **MUST** include all A–C.
- 33 points for 2–3 selections from A–D; **MUST** include 2 selections from A–C.
- 16 points for 1–2 selections from A–D; **MUST** include 1 selection from A–C.
- 0 points for D, E.

**AND**

**50 points for the coverage:**
- Per answer selection A to C, each option will be worth the following proportion: 50/3 points for all (1). 25/3 points for a majority (2). 12/3 points for a minority (3).

**Further details:**
- Selecting ‘E’ will result in 0/100 points for this indicator.

### Multiplier

Moderate
What processes do you have in place to support meeting your targets on material ESG factors for your real estate investments?

For investors with minority stakes in real estate investments, answer options should be selected based on how they use their influence with the assets or properties, majority shareholder(s), and/or lead investors they engage with in co-investment situations to ensure that ESG factors are actively managed to the extent possible.

- (A) We use operational-level benchmarks to assess and analyse the performance of assets against sector performance
  - [Dropdown list]
  - (1) for all of our real estate investments
  - (2) for a majority of our real estate investments
  - (3) for a minority of our real estate investments

- (B) We implement certified environmental and social management systems across our portfolio
  - [As above]

- (C) We make sufficient budget available to ensure that the systems and procedures needed are established
  - [As above]

- (D) We hire external verification services to audit performance, systems, and procedures
  - [As above]

- (E) We collaborate and engage with our third-party property managers and/or tenants to develop action plans
  - [As above]

- (F) We develop minimum health and safety standards
  - [As above]

- (G) We conduct ongoing engagement with all key stakeholders, e.g. local communities, NGOs, governments, and end-users
  - [As above]
☐ (H) Other
Specify: _______ [Mandatory free text: small]

☐ (I) We do not have processes in place to help meet our targets on material ESG factors for our real estate investments

Explanatory notes

Purpose of indicator
This indicator aims to capture the depth of processes and resources an organisation has implemented to help meet their targets on material ESG factors. Actively managing ESG performance requires organisations to adopt a range of potential processes and ensure adequate resources are provided. The specific processes and level of resources will depend on the context of the asset. In all cases, however, these processes and resources should be regularly assessed and adjusted according to their effectiveness in meeting material ESG targets for all real estate assets.

Other resources
For further guidance, see An introduction to responsible investment: real estate, and Sustainable real estate investment: Implementing the Paris Climate agreement - an action framework.

For further guidance, see the BII (formerly CDC Group) ESG toolkit.

Assessment

Not assessed
Post-investment, how do you manage material ESG risks and ESG opportunities to create value during the holding period?

For investors with minority stakes in real estate investments, answer options should be selected based on how they use their influence with the assets or properties, majority shareholder(s), and/or lead investors they engage with in co-investment situations to ensure that material ESG factors are actively managed to the extent possible.

- (A) We develop property-specific ESG action plans based on pre-investment research, due diligence and materiality findings
  
  [Dropdown list]
  
  (1) for all of our real estate investments
  (2) for a majority of our real estate investments
  (3) for a minority of our real estate investments

- (B) We adjust our ESG action plans based on performance monitoring findings at least yearly

- (C) We, or the external advisors that we hire, support our real estate investments with specific ESG value-creation opportunities

- (D) Other
  Specify: _______ [Mandatory free text: small]

- (E) We do not manage material ESG risks and opportunities post-investment

Explanatory notes

Purpose of indicator

This indicator aims to capture how an organisation uses the management of material ESG factors to create value during the holding period of an investment. It is considered good practice for investors and/or their third-party property managers to develop ESG action plans that can be updated according to ongoing performance to create value during the holding period of an investment.
ESG risks and ESG opportunities should be re-assessed continuously to better understand the performance of the investment portfolio and to identify areas for continuous improvement. Doing this in a structural way allows the signatory to assess ESG performance within and amongst portfolios and to potentially assess the performance of other investment managers.

Other resources
For further guidance, see An introduction to responsible investment: real estate.
For more information, see the BII (formerly CDC Group) guidance on ESG action plans.

**PRI Principle:** 1, 2  
**Type of indicator:** PLUS VOLUNTARY TO DISCLOSE

Describe how you ensure that material ESG risks are adequately addressed in the real estate investments where you hold a minority stake.

[Voluntary free text: large]

**Explanatory notes**

| Purpose of indicator | This indicator provides an opportunity for minority investors to describe how they seek to work with other investors or partners to ensure that material ESG risks are adequately addressed in their real estate investments. Even where minority investors are not in a position to directly influence the consideration and management of ESG risks, it is considered good practice to work with other investors and partners to develop a common agenda or approach to ESG and support measures – to the extent possible – that will help implement that agenda. |

VOLUNTARY TO DISCLOSE

Describe how your ESG action plans are currently defined, implemented and monitored throughout the investment period.

[Voluntary free text: large]

### Explanatory notes

**Purpose of indicator**
This indicator provides the signatory with the opportunity to describe what practices they have used in ESG action plans throughout the investment period and their use in creating value and managing risks. It is important to have appropriate systems in place to manage issues on an ongoing basis, including writing an action plan for each asset to identify ways to improve ESG performance.

**Other resources**
For further guidance, see An introduction to responsible investment: real estate.

For more information, see the BII (formerly CDC Group) guidance on ESG action plans.

What proportion of your real estate assets has obtained a green or sustainable building certification?

- (A) All of our real estate assets have obtained a green or sustainable building certification
- (B) A majority of our real estate assets have obtained a green or sustainable building certification
- (C) A minority of our real estate assets have obtained a green or sustainable building certification
- (D) None of our real estate assets have obtained a green or sustainable building certification

**Explanatory notes**

**Purpose of indicator**
This indicator assesses the proportion of an organisation’s real estate assets that have obtained a green or sustainable building certification to determine the quality of the assets invested in, providing benefits for the occupants, society and the environment. Building certifications and ratings give credibility to the sustainability performance of a building and serve as an additional layer of transparency and accountability to inform investors and occupiers of the ESG performance of an asset. It is considered good practice to obtain a green or sustainable building certification for all real estate assets held.

**Additional reporting guidance**
See GRESB building certification schemes for a list of design and/or construction green building certification schemes.

GRESB definition for ‘Green building rating standard’: A rating system or certificate for real estate assets that uses a wide set of environmental criteria. Successful completion of the rating assessment typically results in the award of a certificate that records (a) the completion of the rating assessment process and (b) the level achieved.

**Other resources**
See Sustainable real estate investment: Implementing the Paris Climate agreement - An action framework for more information on sustainability in real estate investment.

For further guidance, see GRESB’s real estate reference guide.

For more information on green building rating tools, see World Green Building Council – Rating tools.

How does your third-party property manager(s) engage with tenants?

*If you are a property manager, report on your direct tenant engagement.*

- (A) They engage with real estate tenants on energy, water consumption and/or waste production
  - [Dropdown list]
  - (1) for all of our buildings or properties
  - (2) for a majority of our buildings or properties
  - (3) for a minority of our buildings or properties

- (B) They engage with real estate tenants by organising tenant events focused on increasing sustainability awareness, ESG training and guidance
  - [As above]

- (C) They engage with real estate tenants by offering green leases
  - [As above]

- (D) They engage with real estate tenants by identifying collaboration opportunities that support targets related to material ESG factors
  - [As above]

- (E) They engage with real estate tenants by offering shared financial benefits from equipment upgrades
  - [As above]

- (F) Other
  Specify: _______ [Mandatory free text: small]
  - [As above]

- (G) Our third-party property manager(s) do not engage with tenants
### Explanatory notes

**Purpose of indicator**
This indicator aims to capture an organisation’s and/or third-party property manager’s approach to engaging tenants on ESG issues, as tenants are the main stakeholder group contributing to the environmental and societal impacts of the building. It is considered good practice for an organisation and/or third-party property manager to engage with property occupiers on ESG issues for all buildings and/or properties. Consequently, organisations can better anticipate and respond to tenant needs when it comes to ESG issues and may be able to better understand the effectiveness of different ESG-related initiatives.

**Additional reporting guidance**
The coverage for each answer option should be based on the number of buildings or properties.

In this indicator, ‘tenant’ refers to a person or group that occupies a house, office, industrial estate or similar.

In this indicator, ‘targets’ may describe changes in environmental or social performance and the relationship to the investment.

**Other resources**
See Sustainable Real Estate Investment: Implementing the Paris Climate Agreement - An Action Framework for more information on sustainability in real estate investment.

**During the reporting year, how did you or the organisations operating on your behalf engage with the local community above and beyond what is required by relevant regulations for asset design, use and/or repurposing?**

[Voluntary free text: large]

### Explanatory notes

**Purpose of indicator**

This indicator aims to understand the methods used by the signatory to respond to community needs and to improve place-based design and operation practices.

**Additional reporting guidance**

'Community engagement' covers engagements with stakeholders located outside, but often close to, properties; it generally includes members of the public, whether individuals or organised groups. Engagement can refer to communication, interaction and any relationships between your organisation and a stakeholder group. If you have dedicated community engagement programs, specify the objectives of these programs in the community and the outcomes they typically intend to deliver. Your description could cover how your organisation and/or your third-party property managers measure and monitor the impact of your community engagement programme, including whether your community engagements have led to significant changes and to what extent you and/or your third-party property managers influenced these changes.

### During the reporting year, what responsible investment information was shared with potential buyers of real estate investments?

- **(A)** Our firm’s high-level commitment to responsible investment, e.g. that we are a PRI signatory
  - [Dropdown list]
  - (1) for all of our real estate investments
  - (2) for a majority of our real estate investments
  - (3) for a minority of our real estate investments

- **(B)** A description of what industry and asset class standards our firm aligns with, e.g. TCFD or GRESB
  - [As above]

- **(C)** Our firm's responsible investment policy (at minimum, a summary of key aspects and firm-specific approach)
  - [As above]

- **(D)** Our firm’s ESG risk assessment methodology (topics covered in-house and/or with external support)
  - [As above]

- **(E)** The outcome of our latest ESG risk assessment of the property(s)
  - [As above]

- **(F)** Key ESG performance data on the property(s) being sold
  - [As above]

- **(G)** Other
  Specify: __________ [Mandatory free text: small]
  - [As above]
<table>
<thead>
<tr>
<th></th>
<th>(H) No responsible investment information was shared with potential buyers of real estate investments during the reporting year</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(I) Not applicable; we had no sales process (or control over the sales process) during the reporting year</td>
</tr>
</tbody>
</table>

**Explanatory notes**

**Purpose of indicator**
This indicator aims to capture whether the signatory includes ESG-related information in its asset sales process. It is considered good practice to disclose ESG-related information regarding real estate investments to potential buyers prior to a sale, increasing the completeness of information available to the buyer and demonstrating good stewardship on behalf of the seller.

Providing evidence of good ESG practice to a potential buyer of an asset can give the buyer greater visibility of potential ESG risks and opportunities, enabling them to make a more informed decision about the asset and its value and avoid potential legal or reputational issues for the non-disclosure of material ESG factors.

### During the reporting year, how did you report on your targets on material ESG factors and related data to your investors?

- (A) We reported through a publicly disclosed sustainability report
- (B) We reported in aggregate through formal reporting to investors
- (C) We reported at the property level through formal reporting to investors
- (D) We reported through a limited partners advisory committee (or equivalent)
- (E) We reported at digital or physical events or meetings with investors
- (F) We had a process in place to ensure that serious ESG incidents were reported
- (G) Other
  Specify: _______ [Mandatory free text: small]
- (H) We did not report our targets on material ESG factors and related data to our investors during the reporting year

### Explanatory notes

**Purpose of indicator**

This indicator aims to understand a signatory’s specific approach to the communication of targets on material ESG factors and related data to its real estate assets. It allows signatories to demonstrate how widely available they have made information on their responsible investment practices. It is considered good practice for signatories to disclose information about their investment activities to the public and investors annually or more frequently.

Private market investments are less transparent than public investment markets. As a result, private market investment managers have an additional responsibility to be transparent to investors and proactively report ESG-related portfolio information. In addition, some jurisdictions are currently developing regulations requiring investment managers to report some ESG-related portfolio information to their clients.

**Reference to other standards**

For examples of an industry-led set of standardised ESG metrics, see GRESB and ESG Data Convergence Project.
